## Summary

---

Dynamic Software Engineer with 1 year of experience, specialising in the development and enhancement of web applications that elevate user engagement. Proficient in leveraging technologies such as React.js and Next.js, delivering responsive and efficient user interfaces through effective cross-functional collaboration. Skilled in implementing RESTful APIs and utilising modern frameworks for back-end development, contributing to the creation of high-quality software products. Committed to adopting agile methodologies to ensure timely project delivery and continuous improvement in code quality.

## Work Experience

---

### Software Engineer, 9commerce Technologies LLP | May 2024 to Present

Unit No.VIIB, 7th Floor Phase III Bldg, Carnival Infopark Infopark Kochi Kerala, India

Engaged as a Software Engineer at 9commerce Technologies LLP, focusing on creating and enhancing web applications. This role involves leveraging technologies such as React.js and Next.js to deliver responsive and efficient user interfaces. Collaborating with cross-functional teams is essential to ensure seamless integration of back-end services with front-end applications, resulting in high-quality software products.

- Contributed to the development of scalable web applications that improved user engagement.
- Implemented RESTful APIs and GraphQL for robust data handling.
- Utilized modern frameworks like Django and Laravel for back-end development.
- Participated in code reviews and team meetings to enhance overall project quality.
- Adopted agile methodologies to deliver projects in a timely manner.

## Education

---

### Bachelor in Computer Application in Computer Science, Stanford University | Sep 2021 to Jun

2024

Malappuram

## Skills

---

- **Technical Skills :** React.js, Next.js, Gin, Laravel, Django, Go, HTML/CSS, Javascript, Bootstrap, Redux-toolkit, Rest, Graphql, Mysql, postgresql
- **Soft Skills :** Leadership, Communication
- **Languages :** Malayalam(Native), English, Hindi

## Projects

---

### DocibOnline – Pharmacy Web Application Revamp, Front-End Development | Apr 2025 to Present

React.js | Laravel | REST API | Front-End Development

Worked on the revamp of DocibOnline, a pharmacy-based web application aimed at enhancing user experience, prescription handling, and online medical product access.

- Front-End Development: Rebuilt and modernized the user interface using React.js, improving performance, responsiveness, and overall user experience for customers and pharmacists.
- Feature Implementation: Developed key features such as prescription upload, product search, and user authentication, ensuring intuitive workflows and compliance with health data handling standards.
- API Integration: Integrated with a Laravel-based backend via RESTful APIs to support real-time prescription submission, order tracking, and user account management.
- UI/UX Enhancement: Focused on clean, accessible design and responsive layouts, optimizing the platform for desktop and mobile users.
- Team Collaboration: Collaborated with backend developers and designers to implement features based on business requirements and customer

feedback.

The DocibOnline revamp improved platform usability, streamlined prescription processing, and laid the foundation for future scalability in digital healthcare services.

#### **Property9 – Internal Land & Property Management Web Application, Full-stack Development | Mar 2021 to Present**

Next.js | Gin (Go) | GraphQL | REST API | Laravel | MySQL | Front-End & API Development

Contributed to the development of Property9, a secure internal web application designed to manage land and property records, automate administrative workflows, and centralize data access for internal use.

- Front-End Development: Built high-performance, responsive interfaces using Next.js, creating a seamless and intuitive user experience for property managers and internal staff.
- API Layer (Gin/Go): Developed and integrated scalable RESTful and GraphQL APIs using the Gin web framework (Go) to handle real-time data flow between the front-end, Laravel backend, and MySQL database.
- Backend Integration: Collaborated with back-end teams leveraging Laravel for admin dashboard functionalities, including secure authentication, access control, and modular data management features.
- Database: Coordinated with developers managing the MySQL schema to ensure front-end requirements aligned with optimized data structures for property listings, land records, and transaction logs.
- System Integration: Built and maintained middleware to ensure smooth, consistent cross-service communication and reliable error handling across all application layers.
- Collaboration: Worked closely with stakeholders to gather business requirements, implement core functionalities, and support internal deployment and user training.

Property9 successfully enhanced internal efficiency, reduced administrative workload, and provided real-time access to critical land and property data across departments.

#### **Store9 – Internal E-commerce Web Application, Front-End Development | Nov 2024 to Present**

Next.js | React | Laravel | REST API | MySQL | Front-End Development

Contributed as a Front-End Developer to Store9, a full-stack internal e-commerce platform built to streamline product management, ordering, and inventory workflows within the organization.

- Front-End Development: Designed and developed dynamic, responsive, and user-friendly interfaces using Next.js and React, ensuring optimal performance and seamless user experience for internal staff.
- API Integration: Integrated custom RESTful APIs to enable efficient communication between the front-end and Laravel-based backend, supporting real-time product catalog updates, order tracking, and user operations.
- Collaboration: Worked closely with backend developers, designers, and business stakeholders to implement features based on internal operational needs and ensure functional consistency across the platform.
- Database Interaction: Coordinated with backend teams managing MySQL to support front-end data needs, optimize queries, and ensure accurate rendering of data-driven UI components.
- Deployment & Testing: Participated in QA testing cycles, provided UI/UX enhancements, and supported the successful deployment of the platform in the internal environment.

Store9 improved internal efficiency by automating key e-commerce operations, reducing manual work, and centralizing access to inventory and order data.
